

Africa iShare is  
a platform for  
Africa to  
interact, learn  
& share ideas.

Partnership Proposal  
2022

Africa iShare was created out of a desire to have a forum to share ideas across Africa.

Our four focus areas for discussion are:

- 1) Africa Technology & Digital economy,
- 2) Africa policies including, China-Africa affairs, AGOA & other Africa focused agreements,
- 3) Africa trade including Africa continental Free Trade Area & Regional Economic Communities, and
- 4) Africa tax, including tax laws, tax policy & tax administration.

## About us

# What gap is Africa iShare addressing?

## Africa iShare

- There are not any informal forums where people from different Africa countries can meet to discuss professional, intellectual, and thoughtful ideas that are Africa related.
- 
- We believe that interactions to discuss & share ideas matter for the growth of the knowledge economy in Africa.

# How is Africa iShare addressing the gap?

---

- The following are the solutions that we offer:
  - We host regular webinars with experts from different African countries,
  - We host a podcast titled 'the Africa We Want',
  - We offer online trainings on our four focus areas, and
  - Host an open talk with people passionate about Africa affairs.
